

Maternity Alert™

*The first and only
medical alert bracelet
designed specifically
for pregnant women.*

Maternity Alert™ *the new medical alert bracelet.*

For many, the news of a pregnancy is the most exciting time in one's life.

Maternity Alert™ bracelet is the only medical alert bracelet that makes known your condition in a medical emergency.

In an emergency situation, tests such as x-rays may be conducted or the administration of certain medications may take place that potentially could cause harm to your unborn child. Maternity Alert™ will alert healthcare professionals of your pregnancy before administrating any harmful treatments.

Maternity Alert™ is fashionable, functional jewelry that is lead free, and it can be a great baby shower gift!

The medical information wallet card gives instant access to all your medical information from emergency contact person and physician contact information to blood type and due date.

The medical ID bracelet and information wallet have been designed by our medical consultant to reflect all your pertinent personal and medical information.
